Concept Tooling monthly news & update

Concept Tooling provide solutions for all of your 3 & 5 axis CNC machining, Pattern-making, Tooling, Jigs and Gauge requirements.

Aluminium & composite tooling and patterns

Concept Tooling have been supplying large scale aluminium and composite patterns and tooling for Composites, RIM, Vacuum Forming, Roto-moulding and RTM for over 20 years to the motorsport, F1 and aerospace industries.

Jigs and Gauges

Image shows a Concept Tooling machining fixture for super-car Carbon-fibre rear dam shell. Concept also manufacture high precision checking gauges for verification and quality control, plus supplying touch and non-touch surface data capture for full dimensional reporting.

Concept gain ISO 9001:2015 accreditation

Earlier this year Concept Tooling were successful in being awarded ISO 9001:2015 accreditation. Underlining our quality assurance.
